TRUVIC Tributes Key Medical Inventors of the Century

Honoring Inventors of Modern Day Medicine

TruVic Private Limited, honors the legacy of visionaries whose groundbreaking contributions have redefined healthcare. Our 2025 calendar is a tribute to these medical inventors who have shaped the foundations of modern medicine. Their inventions and discoveries have empowered generations, inspiring us to continue advancing healthcare solutions that improve lives. As we serve communities across Sri Lanka, Cambodia, and the Maldives, we carry forward their spirit of innovation and compassion in every product we create towards a healthier, more hopeful future for all.

Advancing Health through Inventions; A Legacy of Medical Science

At TruVic Private Limited, we are driven by a shared commitment to improve the quality of life for all. Our work is built upon the foundations laid by the greatest minds in medical science - visionaries who transformed the way we understand and care for health. This year's calendar celebrates six of these pioneers whose inventions have shaped modern medicine. Just as they dedicated their lives to the wellbeing of humanity, we continue their legacy with every product we create, advancing health for a better world.

TRUVIC PRESENCE

SRI LANKA

CAMBODIA

MALDIVES

As TRUVIC strives to foster the path of healthcare innovation, we remain committed to our mission of providing access to life-changing affordable medications. Our global presence extends beyond borders of Sri Lanka, connecting us to diverse communities in Maldives and Cambodia. Our forging strong partnerships with leading international pharmaceutical manufacturers from India, Pakistan, Bangladesh, Australia and Sri Lanka, our distributor partners in Sri Lanka, Maldives and Cambodia and above all, the support from healthcare professionals have ensured that patients have access to the medications they need. Our dedicated team, operating through a lean and efficient network, upholds the highest standards of quality, safety, and efficient operation. As we move forward, TRUVIC remains steadfast in its commitment to innovation, collaboration, and a healthier future for all

Gene Editing Tool CRISPR-Cas9

Jennifer Doudna - 1964

A revolutionary gene editing tool that allows scientists to precisely modify DNA, with potential applications in treating genetic diseases.

Impact on Humanity

Significant potential to cure genetic diseases and improve human health.

 **Invention** Gene Editing Tool CRISPR-Cas9

 **Date of Invention** 2012

Invention mRNA Vaccine Technology

TRUVIC
PRIVATE LTD

2025

mRNA Vaccine Technology

Katalin Karikó - 1955

Pioneered the development of mRNA vaccines, a new type of vaccine that uses messenger RNA to trigger an immune response, leading to the rapid development of COVID-19 vaccines.

Impact on Humanity

Saved countless lives during the COVID-19 pandemic and demonstrated the potential of mRNA technology for other diseases.

Tu Youyou
Invention Artemisinin-Based Combination Therapies

2025

Artemisinin-Based Combination Therapies

Tu Youyou - 1930

Developed artemisinin-based combination therapies (ACTs) for malaria, significantly reducing mortality rates and improving treatment outcomes.

Impact on Humanity

Revolutionized malaria treatment and saved millions of lives.

 **Invention** Artemisinin-Based Combination Therapies

 **Date of Invention** 1970

 **Country** China

James Allison
Invention Immune Checkpoint Inhibitors

2025

Immune Checkpoint Inhibitors

James Allison - 1948

Co-discovered immune checkpoint inhibitors, a type of cancer immunotherapy that uses the body's immune system to fight cancer cells, leading to improved survival rates for patients with certain types of cancer.

Impact on Humanity

Improved survival rates for patients with certain types of cancer.

 **Invention** Immune Checkpoint Inhibitors

 **Date of Invention** 1990

Shinya Yamanaka
Invention Induced Pluripotent
Stem Cells (iPSCs)

TRUVIC
PRIVATE LTD

2025

Induced Pluripotent Stem Cells (iPSCs)

Shinya Yamanaka - 1962

Developed a method to reprogram adult cells into pluripotent stem cells, which can be differentiated into various cell types, opening up new possibilities for regenerative medicine and drug discovery.

Impact on Humanity

Advancements in regenerative medicine and drug discovery.

 **Invention** Induced Pluripotent Stem Cells (iPSCs)

 **Date of Invention** 2006

 **Country** Japan

 **University/Institute** Osaka University
